A single interface for all the components of the GlobalComServer platform!

Totally integrated with the various user address-books, the administration enables you to structure your organization: Profile and rights users, management of groups, multi companies.

Usable locally or remotely as a Windows interface or integrated in the MMC, GlobalComServer's administration ensures a complete and protected system control. From the administration's interface, the automation of alarm tasks, the consultation of the event log, the follow-up in real time of the lines of communication's state, are as many functions which will enable you to have more productivity and effectiveness.
